Mr. J. T. Beckham, Jr.
Vice President - Nuclear Generation
Georgia Power Company
P. O. Box 4545
Atlanta, Georgia 30302

Dear Mr. Beckham:

SUBJECT: TECHNICAL SPECIFICATIONS OF NUREG-0737 ITEMS

We have reviewed your responses to Generic Letter 83-02 regarding the Technical Specifications (TSs) for NUREG-0737 items which were to be implemented by December 31, 1981. Our review indicates that, while your letter of April 10, 1984 commits to do so, you have not provided TSs for Item II.E.4.2.7, "Radiation Signal on Purge Valves."

As you are aware, the requirements of NUREG-0737 have been approved by the Commission for implementation at all nuclear power plants. The staff is expected to fully implement all requirements including the Technical Specifications required by NUREG-0/37. Our targeted completion date is September 1984. Considering the fact that these requirements have been established for a long time, there is a considerable amount of interest in the timely implementation of all NUREG-0737 items.

To accomplish our objectives, you are requested to submit Technical Specifications for above identified items (if they are implemented) within 30 days of the receipt of this letter. Your cooperation is requested in completion this letter.

Sincerely,

"ORIGINAL SIGNED BY
JOHN F. STOLZ"
