

ENCLOSURE 1

NOTICE OF VIOLATION

Entergy Operations, Inc.  
Arkansas Nuclear One

Docket: 50-368  
License: NPF-6

During an NRC inspection conducted on August 6 through September 16, 1995, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions" (60 FR 34381; June 30, 1995), the violation is listed below:

Unit 2 Technical Specification 6.8.1.a requires, in part, that written procedures shall be established, implemented, and maintained covering the applicable procedures recommended in Regulatory Guide 1.33, Revision 2, Appendix A, February 1978.

Regulatory Guide 1.33, Revision 2, Appendix A, February 1978, Section 7.b.(1), states, in part, that procedures should be written for the handling of spent resins.

Procedure 2104.017, Revision 7, "Spent Resin Transfer," provides instructions for the transfer of spent resin from a spent resin tank to a shipping cask and for the clearing of transfer lines which are clogged.

Contrary to the above, on September 11, 1995, a Unit 2 waste control operator failed to utilize the instructions provided in Procedure 2104.017 during an activity to clear an obstruction in the spent resin transfer line. The operator's actions resulted in extensive radiological contamination of the Unit 1 service air system.

This is a Severity Level IV violation (Supplement I) (368/9507-01).

Pursuant to the provisions of 10 CFR 2.201, Entergy Operations, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if it is necessary to include such information, it should clearly indicate the specific information that should not be placed in the PDR and provide the legal basis to support the request for withholding the information from the public.
