MFN No. 165-91  
Docket No. STN 50-605  
EEN-9189

Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Robert C. Pierson, Director  
Standardization and Non-Power Reactor Project Directorate

Subject: **Submittal of Proposed ABWR Technical Specifications**

Reference: Letter from P.W. Marriott (GE) to R.C. Pierson (NRC), Subject,  
Advanced Boiling Water Reactor (ABWR) Technical Specifications  
(TS), MFN No. 155-91, dated December 2, 1991

Enclosed are 34 copies of the proposed Technical Specifications for the ABWR as outlined in the referenced December 2, 1991 letter. An additional set of selected specifications will be submitted by January 31, 1992. These two submittals together will comprise the complete set of proposed specifications where there is expected to be a significant departure from those being finalized under the Improved Technical Specification (ITS) program. As agreed to in the ABWR meeting held in San Jose on December 9-10, 1991, the specifications included in these two submittals, as well as the remaining ABWR specifications (i.e. those that will not differ significantly from the ITS) will be updated as the final ITS product is issued. Once the ABWR Technical Specifications are finalized, they will be documented via an amendment to Chapter 16 of the ABWR SSAR.

Sincerely,

P.W. Marriott, Manager  
Regulatory and Analysis Services  
MC-382, (408)925-6948
