Gentlemen:

Subject: **Docket No. 50-361**
Generic Letter No. 89-13: Service Water System
Problems Affecting Safety-Related Equipment
San Onofre Nuclear Generating Station, Unit 2

- References:
1. January 26, 1990, letter from R. M. Rosenblum (SCE) to J. B. Martin (NRC); Subject: Generic Letter No. 89-13: Service Water System Problems Affecting Safety-Related Equipment, San Onofre Nuclear Generating Station, Units 1, 2 and 3
 2. February 23, 1990, letter from J. E. Tatum (NRC) to Harold B. Ray (SCE); Subject: Response to Generic Letter 89-13, Service Water System Problems Affecting Safety-Related Equipment (TAC Nos. 74056, 74057 and 74058)
 3. April 22, 1991, letter from F. R. Nandy to the Document Control Desk (NRC); Subject: Generic Letter No. 89-13: Service Water System Problems Affecting Safety-Related Equipment, San Onofre Nuclear Generating Station, Unit 1

This letter provides confirmation that we have completed implementation of our program developed in response to Generic Letter 89-13 at San Onofre Unit 2. Generic Letter 89-13, dated July 18, 1989, provided recommended actions to address various problems with service water systems which, in the past, have led to system degradation or failure at some plants. The Generic Letter requires licensees to develop programs to ensure that their service water systems are capable of performing in accordance with their licensing bases. Our first submittal, Reference 1 above, provided a description of the program to be implemented at San Onofre Units 1, 2, and 3. The NRC accepted this program by Reference 2.

This letter confirms that our Generic Letter 89-13 program was implemented at Unit 2 during the recent Cycle 6 refueling outage. The detailed documentation of our program is being retained in appropriate plant records. This satisfies the Generic Letter 89-13 reporting requirements for San Onofre Unit 2.

Our Generic Letter 89-13 program was implemented at San Onofre Unit 1 during the Cycle 11 refueling outage, as reported in Reference 3. Implementation at San Onofre Unit 3 will be completed during the upcoming Unit 3 Cycle 6 refueling outage, as stated in Reference 1.

If you have any questions, please do not hesitate to call me.

Respectfully submitted,

SOUTHERN CALIFORNIA EDISON COMPANY

By:

R M Rosenblum

R. M. Rosenblum
Manager of Nuclear Regulatory Affairs

State of California

County of Orange

On 12/18/91 before me, R M Rosenblum,
personally appeared H Roset, personally known to me to be
the person whose name is subscribed to the within instrument and acknowledged
to me that he executed the same in his authorized capacity, and that by his
signature on the instrument the person, or the entity upon behalf of which
the person acted, executed the instrument.

WITNESS my hand and official seal.

Signature

Holly D Roset
