

November 1, 1995

E. Thomas Boulette, PhD
Senior Vice President - Nuclear
Boston Edison Company
Pilgrim Nuclear Power Station
600 Rocky Hill Road
Plymouth, Massachusetts 02360-5599

SUBJECT: INSPECTION REPORT NO. 50-293/95-24

Dear Mr. Boulette:

This refers to the routine safety inspection conducted by Dr. Jason C. Jang of this office on October 16-20, 1995, of activities authorized by NRC License Number DPR-35 and to the discussions of our findings held by Dr. J. C. Jang with Mr. C. Goddard and others of your staff at the conclusion of the inspection.

Areas examined during this inspection, involving your radioactive effluent control programs, are important to public health and safety and are discussed in the NRC Region I Inspection Report that is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, we noted that you maintained effective programs for radioactive liquid and gaseous effluent control, with capabilities to protect the public health and safety and the environment. We noted further that the responsible individuals in the Chemistry Department had maintained their knowledge to implement the above programs. No safety concerns or violations of NRC requirements were identified in your program.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:

John R. White, Chief
Radiation Safety Branch
Division of Reactor Safety
