Docket No. 50-219

Mr. John J. Barton  
Vice President and Director  
GPU Nuclear Corporation  
Oyster Creek Nuclear Generating Station  
P. O. Box 388  
Forked River, New Jersey 08731

Dear Mr. Barton:

Subject: Inspection No. 50-219/91-36

This letter refers to the safety inspection conducted by Mr. J. Kottan of this office on November 18-22, 1991, of activities authorized by NRC License No. DPR-16, at the Oyster Creek Nuclear Generating Station, Forked River, New Jersey, and to the discussions of our findings held by Mr. Kottan with Mr. S. Levin and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent inspection report.

Within the scope of this inspection, you had in place an adequate program for measuring radioactivity in process and effluent samples. No violations or deviations were observed and no response to this letter is required.

Sincerely,

Original Signed By:  
James H. Joyner

James H. Joyner, Chief  
Facilities Radiological Safety  
and Safeguards Branch  
Division of Radiation Safety  
and Safeguards

Enclosure:  
Inspection Report No. 50-219/91-36
