SUBJECT: REQUEST FOR ADDITIONAL INFORMATION FOR LIMERICK GENERATING STATION,
UNITS 1 AND 2, EMERGENCY ACTION LEVELS (TAC NOS. M92365 & M92366)

Dear Mr. Hunger:

On May 5, 1995, PECO Energy Company submitted an application for review and approval of the revised emergency action levels (EALs) for the Limerick Generating Station (LGS), Units 1 and 2. The staff has reviewed your submittal for LGS, and has determined that additional information, as stated in the enclosure, is needed by the staff to complete our review.

The submittal included: the EAL table, the LGS EAL Technical Basis Manual, and a table that correlated the LGS EALs with the Nuclear Management Resource Council's (NUMARC) example and identified any deviations from the NUMARC guidance. The EAL table, which was organized by initiating condition, contained: the EAL statements, the corresponding emergency classifications, a unique LGS designator number for each EAL, the plant Operating Condition Applicability, and any tables or other data necessary for interpretation of the EAL. The Technical Basis Document gave further details on the EAL, provided justification for any deviations from the NUMARC example and cited specific LGS procedure numbers and other related references.

This requirement affects nine or fewer respondents, and therefore, is not subject to the Office of Management and Budget review under P.L. 96-511.

Sincerely,
ORIGINAL SIGNED BY:
Frank Rinaldi, Project Manager
Project Directorate I-2
Division of Reactor Projects - I/II
