

JAN 17 1992

Docket No. 50-002

University of Michigan  
ATTN: Dr. Ronald F. Fleming, Director  
Michigan Memorial - Phoenix Project  
3038 Phoenix Memorial Laboratory  
Ann Arbor, MI 48109-2100

Dear Dr. Fleming:

This refers to the inspection conducted by Messrs. A. Dunlop, Jr. and C. Cox of this office on December 16, 1991 through January 9, 1992, of activities at the University of Michigan Ford Nuclear Reactor authorized by NRC Operating License No. R-28 and to the discussion of our findings with Mr. G. Cook of your staff via a telephone call on January 9, 1992, at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report, the violation was categorized at Severity Level V and it is not being cited because the criteria in Section V.A of the "General Statement of Policy and Procedure for NRC Enforcement Action," (Enforcement Policy, 10 CFR Part 2, Appendix C (1991)), were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

  
L. Robert Greger, Chief  
Reactor Programs Branch
