Dear Mr. Anderson:

In the past, Wisconsin's Environmental Decade has been on distribution for all correspondence between the Nuclear Regulatory Commission (NRC) and Wisconsin Electric Power Company (licensee for the Point Beach Nuclear Plant Units 1 and 2). This practice was enacted as a courtesy to your organization because of your intense interest in steam generator problems occurring at the Point Beach Nuclear Plant, especially with Unit No. 1. Your organization has participated in several licensing action reviews as Intervenor, including two recent hearings, one involving steam generator tube sleeving at Point Beach Unit 2 and more recently, steam generator replacement at Point Beach Unit 1. However, all steam generator licensing actions at Point Beach are complete and we are discontinuing our practice of including your organization on distribution for correspondence between the NRC and Wisconsin Electric Power Company.

Copies of all correspondence related to the Point Beach Nuclear Plant are available at the local public document room, the Joseph P. Mann Public Library located at 1516 Sixteenth Street, Two Rivers, Wisconsin. Copies are also routinely provided to the State offices in Madison, Wisconsin.

If you have any questions, please call me at (301) 492-4709.

Sincerely,

*Timothy G. Colburn*
