Revised 10/11/91

L4/NRC/

HOUSTON LIGHTING & POWER COMPANY
SOUTH TEXAS PROJECT
SEMIANNUAL FITNESS FOR DUTY PROGRAM
PERFORMANCE REPORT

JULY 1, 1991 THROUGH DECEMBER 31, 1991

In the second half of 1991, there was an increase in personnel at the South Texas Project (STP) due to the outage on Unit II and MWR reduction project. During this time, 1062 tests were conducted on short-term contractors and 44 tests on non-nuclear licensee employees, all of whom were applying for unescorted access. This resulted in 18 failures.

An effectiveness evaluation of the STP Fitness for Duty (FFD) program has determined that pre-employment and pre-badging testing is an effective process for detecting personnel with potential drug abuse tendencies.

Due to the outage, Fitness for Duty Training increased by 33% and Continual Behavior Observation Training by 50%.

To support the change to 10CFR55 and how it relates to the FFD program, there was an increase in communications with Plant Operations to provide guidelines on reportable medications.

EVENTS REPORTED UNDER
10CFR26.73

There were no reportable events from July 1, 1991 through December 31, 1991.
