Wolf Creek Nuclear Operating Corporation  
ATTN: Neil S. Carns, President and  
Chief Executive Officer  
P.O. Box 411  
Burlington, Kansas 66839

SUBJECT: NRC INSPECTION REPORT 50-482/95-16

This refers to the integrated assessment team inspection conducted by Mr. Joseph I. Tapia of this office on August 28 through September 1 and September 11-15, 1995, at the Wolf Creek Generating Station facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. This inspection focused on your quality oversight and corrective action programs with an emphasis on operations and management's involvement in defining and monitoring expectations. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The results of this inspection are documented in the executive summary in the enclosed report. Overall, the team found that Wolf Creek had a good self-assessment capability. Performance issues were known and usually were effectively addressed. The team considered it noteworthy that you have recently implemented changes meant to enhance your corrective action and work control programs. The team was not able to verify the effectiveness of these additional steps since they were early in the process of implementation.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Thomas P. Gwynn, Director  
Division of Reactor Safety
