James River Paper Company, Inc.
ATTN: Robert H. Miller
310 McDonnell Blvd.
Hazelwood, MO 63402

Dear Mr. Miller:

SUBJECT: NOTICE OF LICENSE EXPIRATION

NRC records show the Byproduct Material License identified above expired on September 30, 1995 and no renewal application was filed in accordance with 10 CFR 30.37.

From our discussion with you on October 23, 1995, we learned that you still possess Krypton-85 sealed sources, material which requires a specific NRC license. Your possession of such material without a valid license is a violation of 10 CFR 30.3. If you continue to use and/or possess that material without a valid license, NRC may take escalated enforcement action and may impose a civil penalty.

If you want to continue your program, immediately do the following:

1. Submit the enclosed Form NRC 313, "Application for Byproduct Materials License," within 25 days of the date of this letter to the Materials Licensing Section, U. S. Nuclear Regulatory Commission, Region III, 801 Warrenville Road, Lisle, Illinois, 60532, ATTN: J. R. Madera. Since your license has expired, the application for renewal will be processed as a request for a new license. You must determine if your program is subject to a license fee as specified in Section 170.31, 10 CFR Part 170. If so, submit the appropriate fee along with the application.
2. You must place your byproduct material in secure storage and, until you acquire a valid NRC license, no use of the material or purchase of additional byproduct material is authorized.

If any activities conducted under the license were subject to the reporting activities of 10 CFR 20.407, 20.408, or 19.13, please submit any required reports.
