Mr. James P. O'Reilly, Director U.S. Nuclear Regulatory Commission Suite 2900 101 Marietta Street, NW Atlanta, GA 30323

> BRUNSWICK STEAM ELECTRIC PLANT UNIT 2 DOCKET NO. 50-324 LICENSE NO. DPR-62 SPECIAL REPORT PER TECHNICAL SPECIFICATION 3.7.8 AND PURSUANT TO TECHNICAL SPECIFICATION 6.9.2 (2-SR-84-10)

Dear Mr. O'Reilly:

During an ongoing Unit 2 refueling/maintenance outage, a Unit 2 fire barrier LCO was initiated on June 29, 1984, for a fire door in the Unit 2 Reactor Building. Door No. 303, located on the 50-foot elevation of the building, provides personnel access to the Reactor Building from the roof area of the Unit 2 Turbine Building. The subject LCO was initiated to permit repair of the door, which would not open properly due to problems with the door hinges and interlock device. Required repairs to the door were completed, and the door was returned to service on July 11, 1984. During the time period the subject door was inoperable, appropriate fire watches were maintained.

Very truly yours,

C. R. Dietz, General Manager Brunswick Steam Electric Plant
