Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/92-04; 50-446/92-04
(NOTICE OF VIOLATION)

This refers to the inspection conducted by Messrs. L. D. Gilbert and W. M. McNeill of this office on January 21-24 and February 10-11, 1992. This inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facilities. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and pertained to Unit 1 inservice inspection data review and evaluation. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). We are concerned about the violation because it indicates inadequate overview of contractor inservice inspection activities.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

We have also examined actions you have taken with regard to a previously identified inspection finding. The status of this item is identified in paragraph 2 of the enclosed report.
