Thomas E. Peters
Radiation Safety Officer
The Mannik & Smith Group, Inc.
1800 Indian Wood Circle
Maumee, OH 43537

Dear Mr. Peters:

Enclosed is Amendment No. 07 renewing your NRC Materials License No. 34-26110-02 in accordance with your request.

Please note that the authorized maximum possession limit per source approved for use with the requested Portable Gauging Devices appearing in Items 6, 7, 8 and 9 of the license matches that authorized on the associated Sealed Source and Device Certificates of Registration. Note that your license authorization was further restricted to limit the total number of gauging devices approved for use to a total of 19 gauging devices.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.
