**Subject: LaSalle County Station Units 1 and 2
Unavailable Milk Sampling Location
NRC Docket Numbers 50-373 and 50-374.**

This Special Report is submitted pursuant to the requirements of the Offsite Dose Calculation Manual (ODCM), Section 12.5.1.A. Action c, and Technical Specification 6.6.C. Section 12.5 (Table 12.5.1-1), Radiological Effluent Monitoring Program (REMP), of LaSalle Station's Off-site Dose Calculation Manual (ODCM), specifies three milk samples and sampling locations. On October 4, 1995, only two dairies within ten miles of LaSalle Station were producing milk. A land use census, completed in August, 1995, determined that there were no other available dairies beyond those already participating in LaSalle's REMF. The Offsite Dose Calculation Manual was updated on October 18, 1995 to reflect the current dairy status.

If there are any questions or comments concerning this letter, please refer them to me at (815) 357-6761, extension 2212.

Respectfully,

D.J. Ray
Station Manager
LaSalle County Station
