WILLIAM D. HARRINGTON BENIDS VICE PRESIDENT NUCLEAR August 9, 1984 BECo 84-128 Proposed Change 84-10

Mr. Domenic B. Vassallo, Chief Operating Reactors Branch #2 Division of Licensing Office c? Nuclear Reactor Regulation U.S. Nuclear Regulatory Commission Washington, D.C. 20555

> License No. DPR-35 Docket No. 50-293

Torus Temperature/TMI Modifications Technical Specification Changes

Dear Sir:

Pursuant to 10CFR50.90, the Boston Edison Company hereby proposes the attached modifications to Appendix A of Operating License No. DPR-35. These proposed modifications have been provided to conform with the requirements of NUREG 0661 and Reg. Guide 1.97, Type A variable, and NUREG 0737. The first provides a redundant temperature monitoring system for the suppression pool, and the second segment responds to portions of the TMI Action Plan Requirements of NUREG-0737.

The Torus Temperature modifications add new dimensions to our operational activities and limiting conditions, and are essential for emplacement prior to start up. Installation and intensive testing of the system precluded submittal prior to this time.

Very truly yours,

WHomington
