RECORD OF TELEPHONE CONVERSATION

DATE: 7/7/80 PROJECT: Midland Plant 1&2
RECORDED BY: J. Kane CLIENT: _____
TALKED WITH: Gil Keeley OF CPCo (2-517-788-0321)

ROUTE TO:	INFORMATION	ACTION
	<u>L. Heller</u>	_____
	<u>D. Hood</u>	_____
	<u>A. Schwencer</u>	_____

MAIN SUBJECT OF CALL: Response to G Keeley's previous telephone request of A. Schwencer for clarification of NRC letter of June 30, 1980

ITEMS DISCUSSED: G. Keeley following discussions w/ CPCo Consultants expressed frustration and questions concerning the contents of NRC letter of 6/30/80. He urged that a meeting be held next week to permit direct discussions. J. Kane indicated a meeting would be beneficial but should not be scheduled until CPCo had received the Corps of Engineer's safety evaluation comments which will cover details directly related to the 6/30/80 letter. NRC anticipates receipt of the COE comments by 7/11/80. J. Kane estimated that 2 to 3 weeks of NRC internal review would be necessary, particularly to coordinate the COE efforts in overlapping safety concern issues such as with HES and MEB.

In response to specific questioning by G. Keeley, J. Kane attempted to give the basis for the 6/30/80 request for additional explorations and testing. G. Keeley indicated their consultants would be in the best position to articulate our basis and felt this was reason enough to have an early meeting. G. Keeley indicated he planned to pursue this request with Darl Hood on Monday 7/14/80.

The next action on this matter will be to respond to G Keeley's anticipated request on Monday for an early meeting

J. Kane
