AMENDMENTS TO FACILITY OPERATING LICENSES

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Duke Power Company (the licensee) to withdraw its December 7, 1994, application for proposed amendments to Facility Operating Licenses NPF-9 and NPF-17 for the McGuire Nuclear Station, Unit Nos. 1 and 2, located in Mecklenburg County, North Carolina.

The proposed amendments would have revised the Technical Specifications to modify the action statement concerning the Control Room Air Intake at times when the radiation monitors (EMF-43A and 43B) were inoperable.

The Commission had previously issued a Notice of Consideration of Issuance of Amendments published in the FEDERAL REGISTER on February 1, 1995 (60 FR 6299). However, by letter dated October 26, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendments dated December 7, 1994, and the licensee's letter dated October 26, 1995, which withdrew the application for license amendments. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina.

Dated at Rockville, Maryland, this 9th day of November 1995.
