Gentlemen:

SUBJECT: FEMA OFFSITE EXERCISE REPORT FOR MCGUIRE NUCLEAR STATION

Please find enclosed a copy of the Federal Emergency Management Agency's (FEMA) Report for the offsite portion of the McGuire Nuclear Station Exercise of June 19-20, 1991, which was transmitted to the Nuclear Regulatory Commission (NRC), Region II, on November 5, 1991.

As described in the enclosure, there were no deficiencies identified during this exercise. However, 13 areas requiring corrective actions (ARCA) were identified. The failure to provide emergency workers with proper dosimetry accounted for almost half of the ARCAs. Inadequate radiological training for field teams and emergency workers also produced several ARCAs. An ARCA was also identified in Iredell County where the decontamination center did not have the proper equipment. Several items were recommended for improvement.

We encourage you to assist the appropriate organizations in resolving the corrective actions and improvement items identified by FEMA. Resolution of these items should be completed prior to the next full-scale emergency preparedness exercise.

We also encourage you to work closely with the State and counties in the development of a scenario for the next full-scale exercise that will effectively test the areas in which the above items were disclosed.
