

NOTICE OF VIOLATION

Omaha Public Power District
Fort Calhoun Station

Docket No. 50-285
License No. DPR-40
EA 91-123

During an NRC investigation conducted from August to December 1991, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1991), the violation is listed below:

10 CFR 50.9 states, in part, that information provided to the Commission by a licensee shall be complete and accurate in all material respects.

Contrary to the above, during an inspection conducted in July 1991 and during an investigation conducted from August to December 1991, the licensee provided information to Commission personnel that was not accurate in all material respects. Specifically, the licensee provided copies of Shift Technical Adviser training attendance records from September and October 1987 that were not accurate because they represented attendance at lectures on specific dates when in fact no such lectures were given and were material because they represented that required training had been given.

This is a Severity Level IV violation (Supplement VII).
