## UNITED STATES NUCLEAR REGULATORY COMMISSION REGION V

1450 MARIA LANE  
WALNUT CREEK, CALIFORNIA 94596-5368

MAR 16 1992

Dockets No. 50-275 and 50-323  
Licenses No. DPR-80 and DPR-82

Pacific Gas and Electric Company  
77 Beale Street, Room 1451  
San Francisco, California 94106

Attention: G. M. Rueger  
Senior Vice President and General Manager  
Nuclear Power Generation Business Unit

SUBJECT: NOTICE OF VIOLATION  
NRC INSPECTION REPORT 50-275/92-02 AND 50-323/92-02

This refers to the inspection conducted by L. R. Norderhaug of this office on January 27 - 31, 1992. The inspection included a review of activities authorized for your Diablo Canyon Power Plant. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report. Further, this letter refers to a telephone discussion with W. Crockett and other members of your staff on February 7, 1992.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with facility and contract personnel, and observations of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation is of concern because it represents a repeat of a failure to properly search individuals at the access control point to the protected area as required by 10 CFR 73.55(d)(1). Increased management attention appears warranted to assure that corrective actions taken for identified violations adequately consider the root cause and are of sufficiently broad scope to be effective.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken, and any additional actions you plan, to prevent recurrence. After reviewing your response to the Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further enforcement action is necessary to ensure compliance with NRC regulatory requirements.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.

Record to do:

The cited violation was the first repeat within the last two years. This fact, combined with low safety significance of event, resulted in conclusion that no enforcement conference was warranted.
