Docket No. 50-336
B11284

Director of Nuclear Reactor Regulation
Attn: Mr. James R. Miller
Operating Reactors Branch #3
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Reference: R. A. Clark letter to W. G. Council, dated July 11, 1982.

Gentlemen:

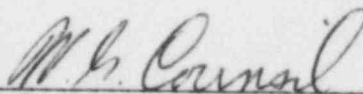

Millstone Nuclear Power Station Unit No. 2
1985 Refueling Outage

In the referenced Safety Evaluation, certain modifications were mentioned as scheduled to be completed before start-up from the 1984 refueling outage for Millstone Nuclear Power Station Unit No. 2. Northeast Nuclear Energy Company (NNECO) wishes to take this opportunity to inform the Staff that, due to the extended outage at Millstone Unit No. 2 in late 1983, the "1984" refueling outage will not occur. The next scheduled outage for refueling will occur in February of 1985. All modifications scheduled for completion before start-up from the 1984 outage will now be completed before start-up from the February 1985 outage.

Please feel free to contact my Staff if you require further information.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

W. G. Council
