

November 13, 1995

Mr. John F. Opeka
Executive Vice President - Nuclear
Northeast Nuclear Energy Company
P.O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

The U.S. Nuclear Regulatory Commission was recently made aware of a concern regarding activities at the Millstone facility. The enclosure to this letter contains the details of the concern for your review and followup. We request that you provide a response to this matter in writing within 60 days of date of this letter to permit proper NRC review and response to this concern.

The Enclosure to this letter should be controlled and distribution limited to personnel with a "need to know." The Enclosure is considered Exempt from Public Disclosure in accordance with Title 10 Code of Federal Regulations, Part 2.790(a). However, a copy of this letter, excluding the Enclosure, will be placed in the NRC Public Document Room.

If you have any questions concerning this matter, please contact Kenneth Jenison of my staff at (610) 337-5356. Your cooperation with us is appreciated.

Sincerely,

Original signed by:

Richard W. Cooper, II, Director
Division of Reactor Projects

DETAILS OF CONCERN

MILLSTONE FACILITY

Mrs. Rena Lee of 620 Blossum Dr., Rockville Md. 20850, Phone number 301-424-1920, stated that in May of 1979 she was working for a contractor (Bechtel) at the Millstone facility, doing anchor bolt inspections (Bulletin 79-02). While working in one of the units, she dropped her dosimeter and noticed that it was reading nearly off scale. She left the area, where she had been sitting on a piping run, and reported to health physics. Subsequent to Mrs. Lee reporting to health physics, the piping run was shielded.

Please provide Mrs. Lee's record of exposure, any radiological occurrence report, over exposure report or incident report, the radiation work permit (RWP) under which Mrs. Lee was working, area radiation surveys for the areas covered by the appropriate RWP, and shielding information for the areas covered by the appropriate RWP. In addition, please provide your assessment of the amount, type, and extent of the exposure received by Mrs. Lee, the method by which the exposure was determined, and any extenuating circumstances which affected your assessment of her exposure.
