Dear Mr. Stewart:

SUBJECT: NRC APPROVAL FOR RESTART: CATEGORY C-3 STEAM GENERATOR (SG) -
NORTH ANNA POWER STATION, UNIT NO. 1 (NA-1) (TAC NO. M80702)

By letter dated March 2, 1992, you requested NRC approval for NA-1 restart following a mid-cycle SG tube inspection outage. NRC approval for restart is necessary pursuant to NA-1 Technical Specification (TS) 3/4.4.5, Surveillance Requirement 4.4.5.2, Table 4.4-2 with respect to the Category C-3 SG inspection results.

On March 2, 1992, you and your representatives presented technical information and the results of the NA-1 mid-cycle SG inspection to the NRC staff. The information and the results were presented to justify restart and operation of the SGs through January 1993, as requested in your letter dated March 2, 1992.

Following your presentation, the NRC staff concluded that the information and data presented justified plant restart and operation through January 1993. The staff's bases and evaluation for restart are presented in the enclosed Safety Evaluation (SE). A formal report documenting the technical information, data and agreed-upon resolution of NRC staff issues as detailed in the enclosed SE is requested to be submitted by April 30, 1992 for staff review.

This requirement affects fewer than 10 respondents and, therefore, is not subject to Office of Management and Budget review under P.L. 96-511.

Sincerely,

/s/
Herbert N. Berkow, Director
Project Directorate II-2
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
