

MAR 16 1992

Docket No. 50-219

Mr. John J. Barton
Vice President and Director
GPU Nuclear Corporation
Oyster Creek Nuclear Generating Station
P.O. Box 388
Forked River, New Jersey 08731

Dear Mr. Barton:

Subject: Inspection Report No. 50-219/92-03

This letter transmits the report of the routine resident safety inspection conducted by Mr. D. Vito for the period January 19, 1992, through February 22, 1992, at the Oyster Creek Nuclear Generating Station. The inspection consisted of document reviews, personnel interviews, and observations of activities. Inspectors discussed the findings with you and members of your staff after the inspection.

While the current environmental qualification (EQ) information appears satisfactory, we are still concerned with the availability of accurate EQ information to the personnel required to work on EQ components. Your efforts to incorporate EQ information into your computerized component data base should improve access to this information and we urge you to follow through with this action. The EQ aspects of your program will be reviewed during future inspections.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

I appreciate your cooperation.

Sincerely,

Original Signed By

E. Wenzinger, Chief
Projects Branch No. 4
Division of Reactor Projects
