

November 14, 1995

Mr. Ted C. Feigenbaum
Senior Vice President and Chief Nuclear Officer
North Atlantic Energy Service Corporation
Post Office Box 300
Seabrook, New Hampshire 03874

SUBJECT: NRC INSPECTION REPORT NO. 50-443/95-11

Dear Mr. Feigenbaum:

From August 15, 1995 through October 2, 1995, Messrs. J. Macdonald and D. Mannai of this office conducted a resident inspector safety inspection at the Seabrook Station, Seabrook, New Hampshire. Areas relevant to the health and safety of the public examined during this inspection are described in the enclosed report. Our findings were based upon observations of performance and independent evaluations of safety systems and quality records. The preliminary results were discussed with Mr. Drawbridge and other members of your staff at the conclusion of the inspection.

Your staff operated the facility in a safe and effective manner throughout the inspection report period. Of particular note was the effective management emphasis and oversight that maintained staff focus on reactor safety during power operations while extensive preparations and prestaging of materials were in progress for the upcoming refueling outage.

In accordance with 10 CFR 2.790 of the NRC "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

No reply to this report is necessary, and your cooperation with us is appreciated.

Sincerely,

Original Signed By:

John F. Rogge, Chief
Projects Branch No. 8
Division of Reactor Projects
