MEMORANDUM FOR: J. A. Hind, Director, Division of Radiological and Materials
Safety

FROM: James G. Keppler, Regional Administrator

SUBJECT: SALP APPRAISALS - ZIMMER AND MIDLAND

By memorandum dated April 1, 1983, I requested approval from the Director of the Office of Inspection and Enforcement to not perform SALP-3 assessments for the Zimmer and Midland Projects.

On April 15, 1983, Mr. Sniezek informed me that HQ's agrees with our position regarding Zimmer. With respect to Midland, however, they believe we should do a SALP assessment in connection with the safety related work that was allowed to continue. They agree that no evaluation is warranted for work to be covered by the CCP.

I'm supportive of HQ's position on this matter and suggest we do a limited SALP-3 appraisal for Midland covering the remedial soils work, the B&W work and HVAC activities. If you have a problem meeting the June 30, 1983 deadline for this appraisal, please let me know.

James G. Keppler
Regional Administrator
