

March 31, 1992

Docket Nos. 50-445  
and 50-446

Mr. William J. Cahill, Jr.  
Group Vice President  
Texas Utilities Electric Company  
400 North Olive Street, L.B. 81  
Dallas, Texas 75201

Dear Mr. Cahill:

SUBJECT: EMERGENCY RESPONSE DATA SYSTEM IMPLEMENTATION PLAN

The U.S. Nuclear Regulatory Commission (NRC) has reviewed the Emergency Response Data System (ERDS) implementation plan which you submitted in a letter dated October 28, 1991. Although your plan indicated that Comanche Peak 2 will complete ERDS implementation within the time frame allowed in the recent change to 10 CFR Part 50, you are requested to submit a detailed breakdown of the schedule for Unit 2 EPDS implementation. Also, since you expressed a desire to implement ERDS at Unit 1 after the required date, an exemption request with justification is required as soon as possible.

It is important to note that the testing phase of ERDS implementation involves all licensees testing with the NRC contractor, Halliburton NUS Environmental Corporation. Since the contractor does not have unlimited resources for testing multiple ERDS links simultaneously, close coordination with the Halliburton NUS personnel in scheduling your ERDS testing will be a key element in the successful completion of ERDS implementation. The project manager at Halliburton NUS is Mr. Tony LaRosa, and he may be reached at (208) 524-9227.

If you have any questions or problems in implementing the ERDS program, please contact Mr. John Jolicoeur, the NRC ERDS project manager, at (301) 492-4155 or me.

Sincerely,

Original Signed By

Thomas A. Bergman, Project Manager  
Project Directorate IV-2  
Division of Reactor Projects III, IV, V  
Office of Nuclear Reactor Regulation
