Dear Sir or Madame,

Subject: Hope Creek Nuclear Generating Station
Docket No. 50-354
License Change Request 91-18
Snubber Visual Inspection Intervals

In a letter dated February 24, 1992, Public Service Electric and Gas Company (PSE&G) submitted the subject license change request to the Nuclear Regulatory Commission (NRC). The license change request proposes to revise the Technical Specification requirements for the visual inspection of snubbers at the Hope Creek Nuclear Generating Station. The proposed changes are in accordance with those recommended by the NRC in Generic Letter 90-09, "Alternative Requirements for Snubber Visual Inspection Intervals and Corrective Actions."

Pursuant to 10 CFR 91(b), the New Jersey Department of Environment Protection & Energy's Bureau Of Nuclear Engineering (BNE) reviewed the subject license change request. Based on this review, the BNE does not have any comment on the proposed license change request.

If you have any questions, please contact Suren Singh of my staff at (609) 987-2033.

Sincerely,

Kent Tosch, Chief,
Bureau of Nuclear Engineering
