Gentlemen:

This refers to the inspection conducted by Mr. H. D. Chaney of this office during the period May 14-18, 1984, of activities authorized by NRC Construction Permit CPPR-103, for Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. R. P. Barkhurst and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included a review of your actions taken to resolve previously identified inspection findings concerning emergency preparedness activities and selected TMI Action Plan Requirements (NUREG-0737). Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified. However, several concerns are discussed in paragraph 4 of the enclosed inspection report that requires your attention.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter, and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
