C. O. Woody
 Vice President Nuclear Operations
 Florida Power and Light Company
 P. O. Box 529100
 Miami, Florida

Dear Mr. Woody:

The enclosed draft Maintenance and Surveillance Program Plan has been revised following the July 6, 1984, NRC/NUMARC Meeting. The revisions include a five phase approach to program management. Each phase has a hold point for EDO review. The plan also includes an identification of relevant industry programs and their approximate schedules. Key interfaces between the Maintenance and Surveillance Program and other NRC programs have been identified.

It is our intention to incorporate, if appropriate, the comments from NUMARC into the plan before forwarding it to the EDO. I will be prepared to address questions or comments on the plan at our meeting on August 21, 1984.

Sincerely,

Original Signed By
 WILLIAM T. RUSSELL

William T. Russell, Deputy Director
 Division of Human Factors Safety
