Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

License No. DPR-35
Docket No. 50-293

Item I.D.1 of NUREG 0737: DCRDR Program Plan, Rev. 1

Dear Sir:

By letter dated March 6, 1984, NRC provided suggestions for the improvement of the Detailed Control Room Design Review (DCRDR) plan which Boston Edison submitted in October, 1983.

Enclosed with this letter are ten copies of a DCRDR program plan revised in accordance with your recommendations, with one exception. Under "General Comments" of your letter, you recommend a human factors evaluation "of the design of the remote shutdown capability"; we have not incorporated such an evaluation because it was not part of the requirements of I.D.1.

We believe this submittal addresses your request of March 6, 1984. Should you wish further information concerning this issue, please contact us.

Very truly yours,

W.D. Harrington

Attachment: 1 copy of DCRDR program plan to Mr. Vassallo
10 copies of DCRDR program plan to Mr. Paul Leech
