Subject: Third Ten-Year Interval Inservice Testing Program  
Cooper Nuclear Station  
Docket No. 50-298, License No. DPR-46

- Reference:
- 1) Letter (No. NLS950131) to USNRC Document Control Desk from NPPD, dated July 14, 1995, "Second Ten Year Inservice Testing Program"
  - 2) Letter (No. NLS950119) to USNRC Document Control Desk from NPPD, dated June 21, 1995, "Second Ten-Year Interval Inservice Inspection Relief Requests"
  - 3) Letter (No. NLS950157) to USNRC Document Control Desk from NPPD, dated October 18, 1995, "Third Ten-Year Interval Inservice Inspection Program"

Gentlemen:

Enclosed with this letter is the initial revision of the Cooper Nuclear Station's Third Ten-Year Interval Inservice Testing (IST) program. This program is being submitted per the requirements of 10 CFR 50.55a and incorporates the latest guidance from the Nuclear Regulatory Commission (NRC) regarding Inservice Testing.

NRC approval of the relief requests for ASME Class 1, 2, and 3 components, contained in the enclosed submittal, is requested by February 29, 1995. The augmented relief requests enclosed do not require NRC approval. The District has rescheduled the Third Ten-Year IST interval to begin on March 1, 1996. The District had originally scheduled the Third Ten-Year IST interval to begin January 1, 1996, as identified in Reference 1. The March 1, 1996 schedule will provide the NRC additional time to review the enclosed program.

Similarly, the District has also revised the beginning date for the Third Ten Year Inservice Inspection (ISI) program to March 1, 1996. The District had originally scheduled the Third Ten-Year ISI interval to begin January 1, 1996 (see References 2 and 3). Based on the revised interval start date of March 1, 1996, the District requests NRC approval of the relief requests associated with the Third Ten-Year ISI program by February 29, 1996.
