AMENDMENT TO FACILITY OPERATING LICENSE

The United States Nuclear Regulatory Commission (the Commission) has granted the request by Duquesne Light Company (the licensee) to withdraw a portion of its September 13, 1995, application for a proposed amendment to Facility Operating License Nos. DPR-66 and NPF-73 for Beaver Valley Power Station, Units 1 and 2 (BVPS-1 and BVPS-2), located in Beaver County, Pennsylvania.

The proposed amendment involved revision of the Administrative Controls section (Technical Specifications (TS) 6.8.6.a.2), 6.8.6.a.7), and 6.14.a.2)) and the Bases section for TS 3/4.11.1.4 of the BVPS-1 and BVPS-2 TSs to be consistent with the requirements of the Offsite Dose Calculation Manual (ODCM). The ODCM was recently updated to reflect the radioactive liquid and gaseous effluent release limits and the liquid holdup tank activity limit of BVPS-1 License Amendment No. 188 and BVPS-2 License Amendment No. 70 which were issued June 12, 1995.

On October 16, 1995, the licensee submitted a letter to the NRC requesting withdrawal of the proposed changes to TS 6.14.a.2) and to the Bases for TS 3/4.11.1.4 because these changes incorrectly referenced superseded sections of 10 CFR Part 20.

The Commission has previously issued a Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing, which was published in the FEDERAL REGISTER on September 22, 1995 (60 FR 49292).

For further details with respect to this action, see the application for amendment dated September 13, 1995, and the licensee's letter of October 16, 1995, which withdrew the portion of the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Rockville, Maryland, 21st day of November 1995.
