

Federal Emergency Management Agency

Region VII
2323 Grand Blvd., Suite 900
Kansas City, MO 64108-2670

NOV 7 1995

Mr. Dennis M. Crutchfield
Division of Reactor Program Management
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Crutchfield:

Enclosed are copies of the final reports for the August 29 and 30, 1995, medical drills of the offsite radiological emergency response plans site-specific to the Cooper and Fort Calhoun Nuclear Stations. The States of Iowa, Missouri, and Nebraska participated in these drills. These reports were prepared by the Federal Emergency Management Agency (FEMA) Region VII staff. A copy of the final reports will be provided to the States of Iowa, Missouri, and Nebraska by the FEMA Region VII staff.

There were no Deficiencies or Areas Requiring Corrective Action identified during these drills. Based on the results of the August 29 and 30, 1995, medical drills, the offsite radiological emergency response plans and preparedness for the States of Iowa, Missouri, and Nebraska and the affected local jurisdictions, site-specific to the Cooper and Fort Calhoun Nuclear Stations, can be implemented and are adequate to provide reasonable assurance that appropriate measures can be taken offsite to provide transport and treatment of contaminated, injured, or exposed individuals.

Should you have any questions, please contact Mr. Robert G. Bissell, RAC Chair and Chief, Training, Exercises, and Evaluation Branch, at (816) 283-7004.

Sincerely,

John A. Miller
Regional Director
