JUN 27 1984

Fairview Hospital  
ATTN: William K. Maxwell  
Administrator  
2312 South Sixth Street  
Minneapolis, MN 55454

Gentlemen:

Enclosed is your new byproduct material license.

Please note that we have not added the names of Dr. Carlson or Dr. Molde to the list of authorized users. We will need additional documentation for both doctors in order to add them to your license.

Dr. Carlson's preceptor shows training in 1975. Since this is in excess of five years, we will need documentation of his continued participation in nuclear medicine from 1975 to the present. The letter dated July 7, 1981 documents 113 hours of didactic training. This does not meet the recommended number of 200 hours as outlined in Reg. Guide 10.8 Appendix A. Please submit documentation that Dr. Carlson has had at least 200 hours didactic training.

Dr. Molde's preceptor shows training in 1972. We will need evidence that he has had continuing experience in nuclear medicine to the present time. We will also need Supplement A for Dr. Molde.

When submitting the above documentation, please mention that is is additional information and reference Control Number 76695.

If you have any questions or require clarification on any of the information stated above, you may contact us at (312) 790-5625.

Sincerely,

Patricia M. Vacherlon  
Materials Licensing Section
