Dallas, Texas 75201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/92-09; 50-446/92-09

This refers to the inspection conducted by Messrs. M. E. Murphy, H. F. Bundy, L. D. Gilbert, L. Eilershaw, J. Gagliardo, D. Graves, R. Latta, and G. Werner of this office during the period of February 10 through March 19, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and these included the reactor-coolant system hydrostatic test procedure review and test witnessing.

Within the scope of the inspection, no violations or deviations were identified. The cold-hydro test procedure was found technically acceptable and lessons learned from the Unit 1 cold-hydro had been incorporated. Test conduct and inspection coordination were found to be excellent and personnel performance was professional.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

*15*  
A. Bill Beach, Director  
Division of Reactor Projects
