Perry Nuclear Power Plant
Docket No. 50-440

NRC Request Concerning Denial of Site Access at Perry

Gentlemen:

In response to your request of October 27, 1995, an investigation has been conducted into the denial of site access concern at the Perry Nuclear Power Plant (PNPP). The investigation was performed independent of the PNPP Site Security organization; the results indicate that regulatory requirements were complied with in the denial of site access.

The individual named in the concern did not request unescorted access to the PNPP site, but rather requested access as an escorted visitor. As such, neither a background investigation nor fitness for duty testing was performed on the individual; therefore, the access denial was not based on negative results from either a background investigation or fitness for duty testing. As a result, notification to the individual per 10 CFR 73.56 or 10 CFR 26 was neither required nor appropriate.

The individual who was denied access to the PNPP site was prohibited from working at any company location (i.e., nuclear and non-nuclear) as a result of previous work history at a company non-nuclear facility. This prohibition formed the basis for the denial of visitor access at the PNPP site.
