Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-313/92-01; 50-368/92-01

This refers to the inspection conducted by Messrs. T. O. McKernon, J. E. Whittemore, and a consultant during the period February 24-28, 1992. The inspection included a review of activities authorized for the Arkansas Nuclear One facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection included a review of your upgraded emergency operating procedures (EOPs) and programs for Unit 2 (ANO-2) and verification that the EOPs were being implemented in accordance with your commitments and regulatory requirements. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

During the course of the inspection, you and other members of your staff made commitments you intend to implement to resolve a concern identified by the inspectors regarding the verification process for the EOPs. This commitment was discussed with you during the exit interview and is summarized in paragraph 4 of the enclosed report. If your understanding of these commitments differs from ours, please contact me immediately.

We have also examined actions you have taken with regard to previously identified program weaknesses. The status of this item is identified in paragraph 2 of the enclosed report.
