License Nos. DPR-76
DPR-75
NPF-57

Mr. Steven E. Miltenberger
Vice President and Chief Nuclear Officer
Public Service Electric and Gas Company
P. O. Box 236
Hancocks Bridge, New Jersey 08038

Dear Mr. Miltenberger:

Subject: Federal Emergency Management Agency (FEMA) Post-Exercise Assessment
for the October 29, 1990 Artificial Island Generating Station Full-Participation Exercise

Enclosed is a letter from Mr. D. H. Kwiatkowski, Assistant Associate Director, Office of
Technological Hazards, FEMA, dated February 18, 1992, together with the subject report
prepared by FEMA Region III. The report only addresses the Delaware portion of the
Emergency Planning Zone (EPZ).

There were no deficiencies identified during the exercise, and FEMA has concluded that
offsite radiological emergency response plans and preparedness for the Delaware portion
of the Artificial Island Generating Station EPZ are adequate to provide reasonable
assurance that appropriate measures can be taken off-site to protect the health and
safety of the public in the event of a radiological emergency at the site. However, the
report identifies 21 Areas Requiring Corrective Action (ARCAs). We request that your
staff follow up with offsite officials to address the identified ARCAs.

If you have any questions concerning this matter, please contact us.

Sincerely,

Original Signed By:
James H. Joyner, Chief
Facilities Radiological Safety and
Safeguards Branch
Division of Radiation Safety and
Safeguards

Enclosure: As Stated
