Attention: Mr. G. F. Wunder

Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION (VCSNS)
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
TECHNICAL SPECIFICATION CHANGE - TSP 890022
ENGINEERED SAFETY FEATURES RESPONSE TIMES

In accordance with 10CFR50.90, South Carolina Electric & Gas Company (SCE&G) is submitting an amendment request to License NPF-12 to amend the Technical Specifications (TS) for VCSNS. The proposed change is a revision to Table 3.3-5, "Engineered Safety Features Response Times." The purpose of this change is to incorporate additional time requirements to account for the sequential stroking of the Refueling Water Storage Tank outlet isolation valves and the Volume Control Tank outlet isolation valves. These response times have been verified during the performance of past Response Time Surveillance Tests.

The amendment request is contained in the following enclosures:

- Enclosure 1 Proposed TS Change
- Enclosure 2 Description and Safety Evaluation
- Enclosure 3 Determination of No Significant Hazards Consideration

The proposed TS change has been reviewed and approved by the Plant Safety Review Committee and the Nuclear Safety Review Committee.

I declare that the statements and matters set forth herein are true and correct to the best of my knowledge, information, and belief.

Should you have any question concerning this issue, please call Mr. Manuel W. Gutierrez at (803) 345-4392 at your convenience.

Very truly yours,

John L. Skolds
