Wayne, PA 19087-0195

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-352/95-14 AND 50-353/95-14

Dear Mr. Smith:

This letter refers to the NRC-graded, biennial, emergency preparedness exercise inspection conducted by Mr. J. Laughlin and others of this office from October 24-26, 1995, of activities authorized by NRC License Nos. NPF-39 and NPF-85 at the Limerick Generating Station, Limerick, Pennsylvania, and to the discussions of our findings held by Mr. Laughlin with Mr. Walter MacFarland and other members of your staff.

Areas examined during this inspection are important to public health and safety and are described in the NRC Region I inspection report, which is enclosed with this letter. Within these areas, the inspection consisted of observations by the inspectors, selective examinations of procedures and representative records, and interviews with personnel.

Within the scope of this inspection, you had effective programs in place for implementing the on-site emergency plan. Overall exercise performance was very good. An exercise strength was the formal repeatback communications demonstrated in the Simulator Control Room and Technical Support Center. No exercise weaknesses were observed. No safety concerns or violations of regulatory requirements were observed, and no response to this letter is required.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

Richard R. Keimig, Chief
