Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

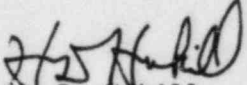

Dear Mr. Eisenhut:

Three Mile Island Nuclear Station Unit 1, (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Employee Protection & Company Communications  
Submittal Correction

On June 29, 1984, GPUN submitted letter number 5211-84-2164 regarding policies for employee protection from discrimination per 10 CFR 50.7 and adequate, accurate corporate communications. Subsequent review of this document revealed that page one of Enclosure 10 was missing from the original report.

Attached to this letter is a copy of this missing page. This should be included in the letter after page 2 of Enclosure 9.

Sincerely,

  
H. D. Hukill  
Director, TMI-1

## Memorandum

Subject: TMI-1 RESTART PROCEEDINGS:  
OBLIGATION TO REPORT TO THE NRC  
ADDITIONAL GUIDANCE

Date: October 19, 1983

From: P. R. Clark

Location: HQ

To: Distribution

This memorandum provides additional guidance for implementing my memorandum dated July 22, 1983 on the same subject.

Preliminary legal review indicates that for information to be reportable, it must be both "relevant" and "material". Working definitions of these terms are:

Relevant - means to relate to the issue.

Material - means to have probative weight, i.e., reasonably likely to influence the tribunal in making a determination required to be made.

A statement may be relevant but not material.

With regard to the TMI-1 Restart Hearing, the issues can be summarized as follows:

### A. Emergency Planning Issues

1. Organization of emergency response organization
2. Accident assessment and dose projection
3. Public education, warning and emergency instruction
4. Protective action and decision making
5. Training drills and audits
6. Facilities

### B. Management Issues

1. Organization (GPUN Corporate and TMI-1)
2. Training of licensed and non-licensed operator (content, administration and facilities)
3. Maintenance (Safety Related)
4. Safety review and operational advice
5. Quality Assurance
6. Key personnel
7. Operating experience review
