

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

April 16, 1992

Docket No. 50-322

LICENSEE: Long Island Power Authority

FACILITY: Shoreham Nuclear Power Station

SUBJECT: SUMMARY OF MEETING WITH THE LONG ISLAND POWER AUTHORITY TO DISCUSS
SHOREHAM DECOMMISSIONING PLAN, 10 CFR 50.59 ACTIVITIES, AND
CONTINGENCY PLAN

A meeting was held with the Long Island Power Authority (LIPA) and Long Island Lighting Company personnel on March 23, 1992, at the NRC office located in Rockville, Maryland. This meeting was held at LIPA's request to discuss matters related to LIPA's proposed decommissioning plan, 10 CFR 50.59 activities, and joint LIPA/LILCO license reversion contingency plan. A list of meeting attendees is provided as Enclosure 1.

Decommissioning Plan

LIPA informed the staff of its desire that the Shoreham decommissioning order be issued by May 15, 1992, based on LIPA's current schedule of site activities. LIPA further indicated that this schedule might be improved by at least a week, which would advance the date by which LIPA would desire the Shoreham decommissioning order to be issued to the first week of May. LIPA stated that at this point the site work force would consist of about 1000 persons and that the costs that LIPA would incur for any delay of issuance of the Shoreham decommissioning order could be as high as \$320,000 per day. Additionally, LIPA pointed out that any delay of approval of its DP may also increase LIPA's cost of radwaste disposal. The cost increase associated with Shoreham radwaste disposal would be as a result of the potential closure of their low-level radwaste repositories to out-of-region shipments of low-level radwaste. The potential LLWR closure could occur by the end of this calendar year.

10 CFR 50.59 Activities

LIPA informed the staff that it was presently evaluating the potential of segmentating of four contaminated systems (CRD, RHR, core spray, and sampling systems) under 10 CFR 50.59 prior to NRC approval of LIPA's DP.
