Gentlemen:

SUBJECT: INSPECTION REPORT NOS. 50-321/92-06 AND 50-366/92-06

This refers to the inspection conducted by J. Moorman on February 11, 1992. The inspection included a review of activities authorized for your E. I. Hatch facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The area examined during the inspection is identified in the report. Within this area, the inspection consisted of selective examinations of procedures and representative records and interviews with personnel.

The enclosed Inspection Report identifies activities that appeared to violate NRC requirements but are not cited; therefore no response is required. This violation is not subject to enforcement action because your efforts in identifying and correcting the violation meet the criteria specified in Section V.G of the Enforcement Policy. The non-cited violation is for failure to promptly report the medical condition of a licensed operator which would cause the license to have a medical restriction.

In accordance with Section 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(ORIGINAL SIGNED BY T. A. PEEBLES)

Thomas A. Peebles, Chief
Operations Branch
Division of Reactor Safety
