

AUG 13 1984

Docket Nos. 50-277  
50-278

Philadelphia Electric Company  
ATTN: Mr. S. L. Daltroff  
Vice President  
Electric Production  
2301 Market Street  
Philadelphia, Pennsylvania 19101

Gentlemen:

On February 10, 1984, you were forwarded a copy of the Final Exercise Report prepared by the Federal Emergency Management Agency for the November 16, 1983 joint exercise of State and local emergency preparedness plans for the Three Mile Island Unit 1 Nuclear Power Station. FEMA identified Category A deficiencies in their report for Lancaster County, which is located within the 10 mile Emergency Planning Zone for your Peach Bottom site.

Based on our continuing dialogue with FEMA Region III, we understand that Lancaster County has taken corrective actions for their Category A deficiencies by reassigning emergency response personnel, revising procedures, and conducting small-scale exercises and communications tests. Further, based on our discussions with the Pennsylvania Emergency Management Agency and members of your staff, we understand that Philadelphia Electric Company has been actively involved in the resolution of these problems. However, to date, there exists no public records which detail the status of corrective actions with respect to Peach Bottom for these deficiencies. To correct this situation, please provide this office in writing by August 31, 1984, a discussion of the Lancaster County deficiencies and related corrective actions, your perception of the adequacy of these corrective actions, a description of additional corrective actions planned and the steps being taken to assure that the Peach Bottom, October 17, 1984, drill can demonstrate adequate resolution.

If you have any questions concerning this matter, please contact Dr. Ronald Bellamy (215-337-5200) of my staff.

Sincerely,

Original Signed By:

Thomas E. Murley  
Regional Administrator
