VICE-PRESIDENT
ENGINEERING AND RESEARCH

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Docket Nos.: 50-352
50-353

Subject: Limerick Generating Station, Units 1 and 2
Information for Auxiliary Systems Branch (ASB)
Regarding SER License Condition #7: Compliance
with NUREG-0612 (Phase II, Heavy Loads).

Reference: (1) Letter, A. Schwencer (NRC) to E. G. Bauer, Jr.
(PECO), dated 2/6/84.
(2) Letter, J. S. Kemper (PECO) to A. Schwencer,
dated 7/26/84

Enclosures: (1) Limerick Overhead Handling Systems Final
Report (Revision 3)
(2) Revision 3 Change List
(3) Comments on the Phase II Draft Technical
Evaluation Report

File: GOVT 1-1 (NRC)

Dear Mr. Schwencer:

We are pleased to provide the following information to support the resolution of SER license condition #7.

Pursuant to your request in Reference (1), the Enclosure (1) report has been revised to address concerns identified in your draft technical evaluation report (TER) on the control of heavy loads (Phase II). The TER was transmitted with Reference (1). Our revised report demonstrates compliance with the guidelines of Sections 5.1.2 through 5.1.6 of NUREG-0612, "Control of Heavy Loads at Nuclear Power Plants" (Phase II).

Consistent with SER License Condition #7, the Enclosure (1) procedure for the control of heavy loads will be fully implemented before startup after the second refueling outage. However, consistent with our Reference (2) commitments, before the standby gas treatment system (SGTS) is connected to the refueling floor, we will handle any load over irradiated fuel in accordance with the appropriate Enclosure (1) procedures.

For your information, Enclosure (2) lists the significant Revision 3 changes to our final report. Enclosure (3) offers our comments and clarifications to correct minor errors contained in the Phase II draft TER.

Should any additional information be required, please do not hesitate to contact us.

Sincerely,

Jw Gallagher
for
J. Kangra
