

August 20, 1984

Docket No.: 50-219  
LS05-84 -08-024

Mr. P. B. Fiedler  
Vice President and Director  
Oyster Creek Nuclear Generating Station  
Post Office Box 388  
Forked River, New Jersey 08731

Dear Mr. Fiedler:

SUBJECT: INTEGRATED PLANT SAFETY ASSESSMENT (IPSAR) SECTION 4.14,  
THERMAL-OVERLOAD PROTECTION OF MOTOR-OPERATED VALVES -  
OYSTER CREEK

Enclosed is the staff's Safety Evaluation of your resolution of IPSAR Section 4.14, Thermal-Overload Protection of Motor-Operated Valves. In the integrated assessment of your facility (NUREG-0822), you committed to evaluate thermal-overload relays for the motor operator for each engineered safety features (ESF) valve. If thermal-overload-relay setpoints could not be conservatively established, you committed to bypass the device. Furthermore, the staff established the position that this evaluation and any necessary corrective actions should be completed before startup after the Cycle X refueling outage. You responded to this commitment via a letter dated July 30, 1984.

As discussed in the enclosed evaluation, the staff concludes that the program described in the July 30, 1984 letter is acceptable to resolve this IPSAR section.

Sincerely,

Original signed by/

Walter A. Paulson, Acting Chief  
Operating Reactors Branch #5  
Division of Licensing
