Wayne, PA 19087-0195

SUBJECT: COMBINED EXAMINATION REPORT NOS. 50-352/95-20 AND 50-353/95-20 (OL)

Dear Mr. Smith:

During the period of November 13-16, 1995, the NRC administered initial examinations to six employees of your company who had applied for licenses to operate Limerick Generating Station, Units 1 and 2. At the conclusion of the examinations, the preliminary findings were discussed with Mr. Boyce and members of your staff.

The initial licensing examination was prepared by your staff, with NRC oversight, in accordance with the pilot operator licensing initial examination process. The examination was of a high quality, requiring only minor changes by the NRC staff prior to administration. It is important to note that the examination did not require any changes following administration, again indicating that the examination was of a high quality.

The six applicants passed the initial examinations and were subsequently issued licenses. We noted a significant improvement during the operating examinations in the applicants' performances concerning the response to, and acknowledgment of, control room alarms.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions regarding this information, please contact me at (610) 337-5198.

Sincerely,

(original signed by)

Michael C. Modes, Acting Chief
Operator Licensing and
Human Performance Branch
Division of Reactor Safety
